

ASCOMETAL® A partner to your success

SPLITASCO®

Grades for splittable connecting rods

Typical end use

Connecting rod.

Properties

- An **optimum compromise** between embrittlement, machinability and wearing properties.

Advantages

A range of grades to meet your needs:

- Splitasco® 70: traditional C70S6 grade with improved machinability;
- Splitasco® 50: very high machining performance;
- Splitasco® 38: good fatigue resistance;
- Splitasco® HC: very high mechanical properties.

Benefits

- **Productivity gains:** improved endurance performance, improved resistance of end part geometry;
- **Compactness and light weight** (down-sizing) for Splitasco® 38 and Splitasco® HC.
