

ASCOMETAL® A partner to your success

JOMASCO® DB

Case-hardening steel with optimized quenchability for drill bits

Ever more demanding requirements lead Ascometal® to offer innovative and efficient solutions.

Properties

- Grade with lower Ni content, than usual grades such as 4718, 4815, 8720, 9313;
- Case-hardening grade with improved quenchability, complying with numerous customer specifications.

Advantages

- Improved behaviour during case-hardening.

Benefits

- Lower alloy surcharge, and more stable related pricing thanks to lower Ni content;
- A specific optimized cost for drill bits – similar mechanical characteristics;
- Improved response to case-hardening.
